# Introduction

Car Care is a product line from Leather Master, Textile Master and Uniteres Pro for cleaning and treatment of leather, textile, microfibres, and the other metals, glass and synthetic surfaces used in cars.

Car Care includes also Uniteres Pro

**Uniteres Pro** is a professional product line for repairing the leather car seats. The line is composed of 6 categories (complementary to each other) that must be respected to guarantee maximum performance results from each product.

All products are developed and perfected at the Research Centre of Uniteres S.p.A.

**Car Care** products ensures your customers retain a clean and refreshed interior.

When an interior is cleaned regularly in the correct way, the interior will look new for a longer period of time.

Cars with interiors that look “as new” when they are traded in will command a better price from the dealer.

Uniteres S.p.A. is supplying products and service to:

- Automotive market
- Furniture market
- Aircraft market
- Marine market
- Moto
- Tanneries
- Fashion
- Consumers

Our Services provide

- Care and Cleaning Service
- Repair Service
- Stain removal from leather, fabrics and synthetic covers
- Leather re-colouring
- Leather repair, fixing holes, tears and scratches
- Restoration of old leather
- Repairing mechanics
- Replacing seat fillings
- After Sales Servicing contract
- Seat cleaning and maintenance at regular intervals
- Warranty packages
- Technical leather advice
- Leather University (leather knowledge classes) and Leather repair classes
- Events
- Marketing tools

## Leather interior repair products

### a. Professional Cleaners

these products are specifically designed for cleaning and preparing leather surfaces prior to repairing them.

### b. Adhesion promoters

they enhance the performance of colours and finishes to be applied later on.

### c. Fillers

these products are for repairing wear and damage to the surface of leather such as cuts, holes, cracking, scratches, abrasions.

### d. Colours

these products is designed to restore colours of aniline leathers and pigmented leathers.

### e. Fixing

these product are developed for preserving and protecting the colour of the leather.

### f. Auxiliaries

### g. Professional Kits

complete kits for the professional repairing of car interiors.

### h. Accessories

e

PRO

# Car interior leather

## a. Professional Cleaners

### Rapid Cleaner S

Rapid cleaner S is an extremely efficient detergent for cleaning leather car interiors. To be sprayed liberally onto the upholstery and then with the help of a cotton cloth or natural bristle brush the leather is deep-cleaned in order to eliminate all dirt from the surface. Although a water-based cleaner, the product contains a powerful de-greasing and cleansing agent so a maximum of two consecutive applications are recommended to avoid any damage to the finish. As well as effectively de-greasing and removing stains and surface dirt from leather, unlike most detergents on the market, Rapid Cleaner S leaves no residue on the surface of the leather ensuring perfect adhesion of any primers or colorants which may be subsequently applied.

### Available

- 200ml  
code: PF00256
- 1 L  
code: PF00564
- 5 L

car car

### Soft Remover

Soft Remover is solvent-based product that will remove deep stubborn soiling from leather. The product is to be used when Leather has not suffered serious damage, like fading or staining. Soft Remover is excellent for cleaning light colour ANILINE Leathers that Rapid Cleaner S were unable to clean properly. Soft Remover when applied on pigmented leather weakens the finish so that any further products you apply can penetrate and adhere to the leather.

### Available

- 500 ml  
code: SL00221
- 1 L  
code: PF00275
- 5 L  
code: PF01441
- 10 L  
code: PF01455

### Strong Remover

Strong Remover is a concentrated solvent-based product that will weaken the finish and remove the finish as well as the underlying colour. This product should be used when deep cracks are visible on the leather, or when major re-colouring is needed. The advantage of this product over other available strong solvents is that Leather Strong Remover does not dry out or harden the leather.

### Available

- 500 ml  
code: SL00215
- 1 L  
code: PF00276
- 5 L  
code: PF01178
- 10 L  
code: PF01464

# Car interior leather

## a. Professional Cleaners

### Super Cleaner

Super cleaner removes tough stains from leather and imitation leather and being a very strong cleaner, it is only to be used on particularly stubborn and/or old stains such as ink, permanent marker pen, enamel paint, to be followed by restoration and re-colouring of the treated area. Super cleaner should be applied lightly to the stain using a cotton bud until partial or complete removal takes place and then re-colouring can be carried out using the special colorants from the Colour Line Pigmented range.

### Available

- 1 L  
code: PF00447
- 5 L  
code: PF02588
- 10 L  
code: PF01490

### Degreaser Paste

Degreaser Paste is a specific cleaner for the removal of any greasy stains or residues from upholstery or steering wheels.

### Available

- 500 ml  
code: PF03403

car car

## b. Adhesion promoters

### Pre-Bottom S

Pre-Bottom S is a solvent-based primer for leather which has little absorbency and therefore presents problems with adhesion. It is generally used on discoloured seats with little damage/wear. Thanks to its special formula applied after suitable cleaning of the surface, colorants from the CLP series may then be applied with optimal adhesion. Pre-Bottom S may either be applied with a spray gun or with a soft cotton cloth in the more difficult to reach areas. A matching colorant from the CLP range should then be applied within 2-3 minutes of applying Pre-Bottom S.

### Available

- 1 L  
code: SL01484
- 5 L  
code: SL01082
- 10 L  
code: SL01066

### Pre-Bottom C

Pre-Bottom C is a water-based cationic primer designed for old leather which is particularly worn and cracked. It guarantees optimal performance in terms of colour adhesion. Pre-Bottom C is to be blotted evenly onto the seat and worked into any cracks in the leather. Pre-Bottom C may be also used to provide a uniform finish in the case of uneven absorption by applying the product both manually or with a spray.

### Available

- 500 ml  
code: SL01062
- 1 L  
code: PF00305
- 5 L  
code: PF01141
- 10 L  
code: PF01361

# Car interior leather

## b. Adhesion promoters

### Pre-Bottom A

Pre-Bottom A is an excellent water-polyurethane based primer and adhesion promoter. Due to its special formula it promotes high levels of adhesion on several surfaces, even synthetic ones. Pre-Bottom A is to be blotted on with a cotton cloth or lightly sprayed on prior to applying the Filler or colorants from the CLP range.

### Available

- 1 L  
code: PF03162
- 5 L  
code: PF03163
- 10 L  
code: PF03139

## c. Fillers

### Leather Filler

Leather Filler is a water-based filler for filling scratches on the leather or for restoring areas where the grain is missing. This filler is particularly flexible to enable use on the softest parts of the seat to repair scratches and superficial abrasions. In case of deeper scratches a more generous layer should be applied in order to compensate for slight thinning as product dries. The treated area may be blended in using fine sandpaper prior to applying colorant in order to provide a uniform finish. Leather Filler may be coloured to the desired hue by mixing with colorants from the Colour Line Pigmented up to a ratio of 10% of colorant.

The filler should be left to dry naturally at least overnight and should not be dried manually with hot-air as this could compromise the quality of the finish.

### Available

- 60 ml  
code: PF00057
- 1 L  
code: PF00847

car car

### Leather Filler W 25

Leather Filler W 25 is a highly concentrated water-based filler. Leather Filler W 25 is designed to fill areas damaged by scoring, scratches, abrasions or with cracks of some depth. In fact, due to its special formula it provides optimal filling together with high adhesion and good flexibility. Leather Filler W 25 is to be applied with a spatula, a toothpick or similar tool, exerting slight pressure in order to fill the fissure completely.

#### Available

- 60 ml  
code: PF01160
- 1 L  
code: PF01463
- 10 L  
code: PF02115

### Leather Filler 3

Leather filler 3 is a highly concentrated water-based filler. It differs from Leather filler W 25 for its more rigid consistency making it also suitable for filling plastic parts. It is designed for filling damaged areas, holes or cracks of considerable thickness but cannot be used on the soft part of the seat. Leather Filler 3 is to be applied with a spatula exerting slight pressure in order to fill the fissure completely.

#### Available

- 60 ml  
code: PF03474
- 1 L  
code: PF03378

### B Compound

B Compound is a highly concentrated water-based filler which only dries at very high temperatures (around 200°). B Compound is used to restore the grain of the leather surface in case of holes, such as burns.

SEE RELATIVE PRODUCT:  
New Leather Grain Copier

#### Available

- 50 ml  
code: PF02211

## d. Colours

Uniters is equipped with a computerised mixing system for bespoke production of colorants. Also on sale to customers is a complete system for reading and recognizing the personalized colour composition and a dosing machine which produces the colorant.

You can select your colours by:

- using our Spectrophotometer
- capsure
- consulting Uniters Colour Charts available in 60 standard colours
- contacting Uniters to request Touch-up range personalized colorants.

**Colour Line Aniline** this product is designed to restore color to ANILINE Leathers and is the product in the custom touch up for ANILINE Leathers. It also is great for shading unmatched panels on ANILINE Leathers. You can make the lighter panels match the darker ones.

Available colours:

- 10 primary colours for personalized self-service
- mixing personalized colours for Touch-Up series (140 ml.)

**Colour Line Pigmented** It is a water-based product for repairing light to medium cracking and fading for pigmented leathers. Colour Line Pigmented has self-fixing agents, which affix the product to the leather as a result it is not necessary to use any kind of top-finish fixer. The properties of the product improve with heat and time.

Available colours:

- 15 primary colours for personalized self-service
- mixing personalized colours for Touch-Up series (140 ml.)

**CLP HC** It is a water-based product for the re-colouring of pigmented leathers. Colour Line Pigmented HC has self-fixing agents, which affix the product to the leather as a result it is not necessary to use any kind of op-finish fixer. The properties of the product improve with heat and time. Colour Line Pigmented HC has double the concentration of pigments and covers exceptionally well. Do not apply too much product so as to avoid giving the leather an unnatural look.

Available colours:

- 15 primary colours for personalized self-service
- mixing personalized colours for Touch-Up series (140 ml.)

SEE RELATED ACCESSORIES:  
Spectrophotometer, Colour Charts.

## Fixing

### Top 3

Top 3 is a polyurethane product with solvent used to fix previously applied colorants and to greatly increase resistance to wet-dry rubbing and in order to restore the desired or the original degree of shine/opacity of the leather. The performance of the product is further improved if the cross-linking product Hardener SLR is added up to a ratio of 5%, this mixed solution must be used within 8 hours. Top 3 is available in Top 3 GLOSS shiny and Top 3 MATT opaque versions. Top 3 GLOSS is to be applied pure to obtain very shiny finishes, with high chemical-physical solidity and excellent texture. Top 3 MATT is to be used at a maximum ratio of 50% combined with Top 3 GLOSS and provides a very uniform opaque finish which is pleasant to the touch. Top 3 is to be applied with a spray gun in one or two light coats in order to wet the surface but without clouding.

### Available:

## Fixing

### FIX W100

FIX W100 are water-based polyurethane fixatives. FIX W100 is available in FIX W100 GLOSS shiny and FIX W100 MATT opaque versions. Both products provide optimum distribution and adhesion, as well as high physical-mechanical solidity which may be further improved if the cross-linking Hardener TA is added at a maximum ratio of 5%. FIX W100 GLOSS and FIX W100 MATT may be used pure to obtain a high quality finish which is extremely flexible and extremely pleasant to the touch.

### Available:

code: PF02153
- 10 L  
code: PF02766

### FIX 181

FIX 181 is a universal solvent-based fixative. The specific ingredients it contains provide a very fine film so it may be used even on leathers such as nubuk and suede in order to improve colour fixation. It is available in two versions FIX 181 GLOSS shiny and FIX 181 MATT opaque. FIX 181 GLOSS provides a medium sheen film, whilst FIX 181 MATT is to be applied mixed with FIX 181 GLOSS at up to a maximum ratio of 40% in order to obtain opaque finishes.

### Available:

## f. Auxiliaries

### Opacante B

Opacante B is an opacifying agent used in water-based products such as CLP, CLP HC, CLA colorants at a ratio of 5-10%. This product enables a high deep matt finish which is long lasting over time. The product should always be strained following the addition of Opacante B.

### Available:

- 250 ml  
code: PF02815
- 500 ml  
code: PF03191
- 1 L  
code: PF02813
- 5 L  
code: PF02807

### Smart Glue

Smart Glue is a water-based polyurethane adhesive for leather. After a suitable drying period Smart Glue remains flexible but also particularly strong, in fact, after repair the leather remains practically unchanged. It is the perfect product for repairing cuts, tears, scratches, punctures, etc. To be applied with a spatula on both sides of the cut, removing any excess glue, then press for at least one minute and leave to dry thoroughly. For tears and holes use reinforcing canvas on the underside of the leather to strengthen the repaired area.

### Available:

- 8 ml  
code: PF03134

## f. Auxiliaries

### Mouldmaker

Mouldmaker consist of two components that thanks to the application Glue Gun and mixing nozzle are combined together to form a paste that is applied to the grain side of the leather. This mixture is left to dry so as to create a negative mould of the grain. After applying B Compound to the damaged area, place the copy of the grain made with Mouldmaker on top of the B Compound and cover it with the Telfon sheet. Set the temperature of the Hot Iron between 150 and 200°C and place it on the telfon sheet, exerting a certain amount of pressure for 30 seconds so as to recreate the original texture of the leather.

### Available:

- Kit Mouldmaker start package  
code: PF03152
- Refill Mouldmaker  
code: PF02210

### Hardener SLR

Hardener SLR is a catalyser for solvent-based products. To be used mixed with Top 3 fixative at a ratio of 3-5 %, after 24-48 hours from application it guarantees optimum chemical-physical performance and is makes the leather easy to clean without any negative effects on the finish. Once Hardener SLR has been added, the resulting mixture must be used within 8 hours.

### Available:

- 60 ml  
code: SL00172
- 1 L  
code: PF00790
- 5 L  
code: PF01201
- 10 L  
code: PF01184

car car

### Hardener TA

Hardener TA is a catalyser for water-based products such as CLP and CLP HC series, CLA colorants and naturally for FIX W 100 fixatives. It is to be added to the product at a ratio of 3-5% and in terms of resistance to dry wet rubbing and cleanability, best results will be obtained 24-48 hours from application. Once Hardener TA has been added, the resulting mixture must be used within 8 hours.

### Available:

- 60 ml  
code: PF00454
- 1 L  
code: PF00772
- 5 L  
code: PF01331
- 10 L  
code: PF01454

### Distendente Penetrante

Penetration Additive is a specific product that increases the penetration and thus the adhesion of water-based products that are applied on leather. A typical use is with the CLP and CLP HC colour series, adding 20-30% of the Penetration Additive, you achieve a better adhesion especially on leather that is a little ruined or undamaged leather, that require recolouring to uniform the colour with the rest of the area, for example, when replacing a part of a sitting area with new leather that is not perfectly in tone with the rest.

# Car interior leather

## Leather upholstery treatment products

Car care is a range of Leather Master and Textile Master products for the cleaning and treatment of leather, fabric and microfiber interiors and other metallic, glass and synthetic car surfaces.

Car Care products ensure car interiors are always kept clean and looking like new.

If the car interior is cleaned regularly with suitable products, it will be kept looking like new for longer.

With their leather or fabric interiors restored, second-hand cars will be sellable at a higher price.

### a. Specific cleaners

these are specific cleaners for general regular cleaning, for deep cleaning and for treating wear and tear and any other problems which leather car interiors may present;

### b. Protectors

these are products designed for the protection of leather car interiors;

### c. Leather Kits

### a. Specific cleaners

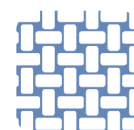

#### Car Leather Cleaner

Leather Cleaner auto is a gentle water-based cleaner for general regular cleaning of leather car interiors. It de-greases leather without altering its appearance but restores it to its former condition. If used regularly, in combination with Leather Protection Cream Auto, it keeps the leather soft, resistant, opaque, practically looking like new for longer, preventing it from drying out due to the specific active ingredients in its formula.

#### Available:

- 200 ml  
code: SL00792
- 1 L  
code: PF02172
- 5 L  
code: PF02274

# Car interior leather

## a. Specific cleaners

### Ink Away

Ink Away works well for removing ink, lipstick and pen marks. It works best when used with our system of Leather Protection Cream. It is designed for removal of recent (3 - 5 days) ink on leather.

### Available:

- 25 ml  
code: PF00851

### Colour Transfer Remover

Eliminates colour transfer on pigmented leathers, such as blue jeans transfer, newspaper print transfer, fresh ballpoint, shoe polish, lipstick, chewing gum, permanent markers.

### Available:

- 1 L  
code: PF02524
- 5 L  
code: PF02739

### Mould Killer

Mould Killer removes efficiently mould and mildew from leather. It also reduces the smell of mould.

### Available:

- 250ml  
code: SL01017
- 1 L  
code: PF00749
- 5 L  
code: PF03265
- 10 L  
code: PF01449

car car

### Spew Remover

Spew Remover is a product used to remove the natural oils that move from the inside of the leather to the surface, forming a milky film or haze. Spew Remover applied with a cloth removes any traces of natural fat and, in most cases absorbs into the leather and prevents the spew from reappearing.

#### Available:

- 225 ml  
code: PF00269
- 1 L  
code: PF00573
- 5 L  
code: PF01249
- 10 L  
code: PF00269

### Leather Odour Remover

Leather Odour Remover eliminates bad smells from all types of leather. It is not a perfume but a true neutralizer for better hygiene.

#### Available:

- 1 L  
code: PF02193

### Ink Killer

Ink Killer removes biro pen marks and stubborn stains due to transfer from pigmented leather. It is very strong and efficient on marks such as biro, felt-tip pen, nail varnish. It is a specialist product and after using this cleaner the area normally needs to be re-coloured by a professional.

#### Available:

- 1 L  
code: SL01216
- 5 L  
code: SL01315

# Car interior leather

## b. Protectors

### Car Leather Protection Cream

Car Leather Protection Cream gives nourishment and excellent protection against every kind of soiling, water, oil, alcohol-based stains and perspiration marks. This enhances the durability of your leather. Its water and oil repellent effect is particularly suitable for leather used in cabriolets. Heavily used seats and steering wheels, such as cars, aeroplanes, buses and trains quickly become glossy as the soil “polishes” the leather. Glossy seats look poor and cheap. Car Leather Protection Cream brings back the matt sheen to the leather. This product is not suitable for nubuck and suede.

### Available:

- 250 ml
- 1 L  
code: PF00565
- 5 L  
code: PF01026
- 10 L  
code: PF01071
- Tubo 60 Wipes  
code: PF01725

### Leather Vital

Leather Vital is a mild care revitalising product for leathers, with the exception of nubuck and suede. Leather Vital Auto keeps the necessary balance of moisture and fat in the leather allowing it to stay soft and supple. Even older, dried out and stiff leather will get back its natural touch. Leather Vital Auto is excellent for stopping the squeaking noises that can happen to leather motion furniture and seats. This product is applied to the parts where leather is in direct contact with leather.

### Available:

- 250 ml
- 1 L  
code: PF00566
- 5 L  
code: PF01076
- 10 L  
code: PF01832

car car

### Leather Barrier

Reduces the probability of future colour transfer on light leathers.  
Do not use on dark colours!  
Do not use on nubuck or suede!

### Available:

- 225 ml
- 1 L  
code: PF02662
- 5 L  
code: PF02816

## G. Leather Care kit

### Car Interior Leather Care Kit

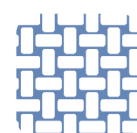

This kit contains products specially designed for the cleaning and protection of your leather car interior. By using these products your leather will maintain the original mattess as well as a nice soft touch through the years.

### Contains

- 1 Leather Soft Cleaner Auto 150 ml
- 1 Leather Protection Cream Auto 150 ml
- 1 Sponge
- 1 Soft Cloth

### Available

- Packed per 24 kit  
code: PF02108

# Fabric car interior

## Fabric interior repair products

### Repair kit Fabric Auto

Car Fabric Repair Kit: A complete repair kit for interiors in fabric, microfibre and Alcantara. It consists of 40 colour powders, which are mixable allowing you to achieve desired tone, a set of coloured pencils and all the accessories needed for the repair and finishing.

### Available

- Suitcase  
code: PF02212

## Fabric interior cleaning and protection products

### a. Specific cleaners

A series of cleaners, for general cleaning and specific types of stains that we can find in car fabric interiors.

### b. Protectors

These specific products are for the protections of car interiors in fabric, microfibre and Alcantara.

### c. Auxiliaries

### d. Fabric Kits

Kits for cleaning and for the protection from general soiling.

# Car Exterior

## Car exterior cleaning and care products

### Car Shampoo

Car Shampoo is a concentrated product for the cleaning and care of your cars body paintwork. Car Shampoo is ideal for fast and easy cleaning with a water repellent effect and it gives a good shine to your car.

### Available:

- 500 ml  
code: PF02587

### Glass Cleaner

rapidly removes dirt from windscreens and windows leaving the surface sparkling clean and transparent without smearing. Glass cleaner does not damage the paintwork or rubber parts. It is also suitable for cleaning visors of crash helmets. Glass Cleaner also has an anti-misting and water-repellent effect.

### Available:

- 500 ml

### Master Car Shine

Master Car Shine is an efficient product for the care and protection of your car paintwork. This product does not contain silicones and can be used on all types of car paintwork. Master Car Shine polishes the surface and has an excellent water repellent effect. It is ideal also for glass, plastic and synthetic rubber surfaces without leaving rings or yellowing.

### Available:

- 500 ml  
code: PF02580

car car

### **Rim Cleaner**

Rim Cleaner removes stubborn dirt (brake dust and general traffic film) from the wheels of your car. For use on all wheel types, including steel, alloy and plastic versions.

### **Available:**

- 500 ml  
code: PF02578

### **Plastic & Tyre Revitalizer**

Plastic & Trim Revitaliser is silicone free and suitable for all interior and exterior plastic and rubber surfaces. It revitalises plastic and rubber, giving an excellent 'as new' finish.

### **Available:**

- 500 ml  
code: PF02584

# Car Exterior

## Car exterior cleaning and protection systems

There are two systems for the cleaning and protection of car exteriors:

**System Surface Guard**  
Water based

**System Paint Guard**  
Solvent based

### System Paint Guard Water based

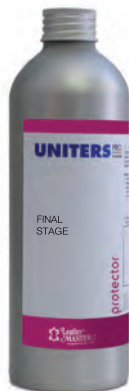

#### First Stage

First stage is a water-based product used for removing any greasy film, previously applied product residues and traffic dirt prior to the application of Final Stage. The product is used not only for the removal of dirt but also to prepare the surface of the car.

#### Available:

- 500 ml

#### Final Stage

Final Stage is a water-based emulsion of waxes and fluorocarbon, deriving directly from the field of nanotechnology, to protect automotive paintwork. The development of Final Stage is the result of rigorous research and testing using the latest nanotechnology. The formula of Final Stage combines with that of First Stage creating a permanent link with the surface of the paintwork, providing an optimal protective barrier, like a second skin, resistant to contamination and providing protection against the attack of pollutants and road dirt.

#### Available:

- 500 ml

car car

# System Paint Guard Solvent based

## Paint Guard Stage 1

Paint Guard Stage 1 is a product specifically designed to prepare the surface of automotive paintwork for molecular integration with the product that will be applied afterwards, Paint Guard Stage 2. Paint guard stage 1 is to be applied to the car paintwork only when perfectly clean and dry.

### Available:

- 500 ml

## Paint Guard Stage 2

Paint Guard Stage 2 is a water-based emulsion of waxes and fluorocarbon, deriving directly from the field of nanotechnology, to protect automotive paintwork. The development of Paint Guard Stage 2 is the result of rigorous research and testing using the latest nanotechnology. The formula of Paint Guard Stage 2 combines with that of First Stage creating a permanent link with the surface of the paintwork, providing an optimal protective barrier, like a second skin, resistant to contamination and providing protection against the attack of pollutants and road dirt.

### Available:

- 500 ml

# Uniters Spa

## Company Profile

From left to right: Bart Van der Haegen - Dr. Leo Tork - Gordian Tork.

### Company Profile

Uniters is an international company that manufactures and sells over 350 products for the care, cleaning and protection of leather, fabrics, wood and marble.

Uniters was established in 1991 by Gordian Tork, Chairman of the Board of Directors.

Uniters is now one of the World's top names in the production of care products for upholstery materials.

car car

## The Group

Uniters leads an international group of companies organised into different production divisions, which cooperate in the field of research, manufacturing and worldwide product distribution.

Uniters S.p.A. - Italy -  
The main company of the group with the Research Centre, registered offices, administrative and sales offices and main production plant.

## Uniters worldwide

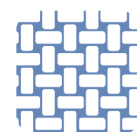

Multimaster-Uniters is truly an international group. Its "global" market presence allows Multimaster-Uniters to be 'closer' to commercial customers and end users. Multimaster-Uniters guarantees immediate technical assistance and prompt responses to all customer enquiries, as well as offering the most efficient logistic solutions for transport and packaging needs.

## Distribution

Uniters' products and services are available in over 80 countries on 5 continents:

# Uniters Spa

## Markets

Uniters' understand the importance of identifying new market opportunities which enable the company to expand its target audience and to maintain product diversity.

Uniters' products and services cover the following market segments:

- Upholstery
- Automobile
- Motorcycling
- Boating
- Fashion
- Aviation

## Production

Uniters has based its production on high-tech plant facilities and sophisticated production procedures to guarantee unsurpassed quality in terms of product and order implementation.

Uniters has invested in the state-of-the-art fully computerised mixing systems to turn the formula perfected by the team at the Research Centre into large volumes of finished product.

The bottling lines are completely automated to ensure flexibility of control as well as compatibility with all Uniters product types, container sizes and labelling requirements.

## The Research Centre

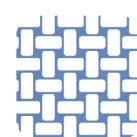

The Research Centre is the heart of Uniter. It is here where science meets the inventive and creative capacity of man.

It is the core around which everything in Uniter revolves, and is always responsible for the first phase in the life cycle of any product and all the subsequent sales and marketing activities associated with it.

This is where Dr. Leo Tork and his international team of researchers ensure that Uniter products give users exactly what they need and where all new Uniter cleaning and protection products and solutions are created.

The Research Centre is the place where thought and reflection merge with machinery and technology to guarantee unbeatable results.

# Uniters Spa

## Certifications

Uniters guarantees that all its products and services are conform to the strictest standards of quality, reliability, performance, environment and safety.

Respect for precise manufacturing procedures has earned Uniters S.p.A. the ISO 9001 Quality Certificate.

To optimise its environmental policy, UNITERS obtained the UNI EN ISO 14001 Environmental Certification.

In 2005 UNITERS has also achieved the OHSAS 18001 certification for workforce health and safety.

Finally, in 2006, Uniters achieved the Certificate of Excellence, an official document given by the agency to companies that have obtained the three certifications in respect of Quality, Environment and Safety.

UNI EN ISO 9001:2000 Quality Certificate.

UNI EN ISO 14001:2004 Environmental Certificate.

OHSAS 18001 Workforce Health and Safety Certificate.

Certificate of Excellence.

## Customer Service

Uniters uses call centres on 4 continents: in the United States (for the North and South American markets), Netherlands (for the European market), Japan and Australia.

Uniters works closely with leading manufacturers to provide after sales service for leather and fabric upholstery.

To deliver this service the Uniters uses an international network of experts with the technical competence necessary to solve all sorts of problems involving dirt, stains, fading and repair.

car car

# Marketing and Communications

Uniters places its' Marketing and Communications department at the disposal of its' customers to help design and implement packaging and communication solutions that match their company strategies and marketing plans.

A team of graphic designers is ready to process any request for custom box designs, labels and leaflets and to creatively but functionally interpret customers' special communication needs.

# University

Uniters can rely on competent and professional operators and technicians. Thanks to training, which takes place directly in the company, continually updating staff on the characteristics of the leathers and fabrics, intervention techniques, covering repairs and different cleaning methods.

Strengthened by this experience, Uniters has decided to open UNITERsity, the new training service and refresher courses for professionals.

The manufacturers will be able to enrol their technicians in UNITERsity courses, who will be able to have access meetings and workshops related to important issues such as:

- Identification of different types and characteristics of leathers and fabrics
- Upholstery cleaning, stain removal and protection methods;
- product characteristics and use.
- Technical assistance and covering repairs.

At the end of the course, participants will be able to analyze, manage and resolve better the different issues that arise every day during their working hours.
